Helpsy is a certified B Corp dedicated to keeping clothes out of the trash.

Certified B Corporation

What happens to the clothes we collect?

Helpsy focuses on reuse ahead of recycling. 95% of what we collect can be reused. 45% is reused as apparel, 30% as wipers, and 20% as insulation.

Helpsy sells to customers such as thrift stores, online resellers, sorters and graders. In 2024 most of our sales were in North America.

We take seriously our mission of keeping clothes out of the trash and buy things back from our customers that they can't use. For example, we buy coats from warmer regions and donate them in communities we work.

What sets us apart?

Our commitment to excellent customer service including impact and tonnage reporting

Our commitment to education, data transparency, collaboration and innovation

We create honorable green jobs and responsibly handle materials that we collect and use.
