Make a difference, latch it!

Introducing The SafeWaste Auto-Release Cart Lid Wind Latch

Trash Can Auto-Release Lid Latch

Designed for outdoor bins with two wheels, intended for curbside collection.

SAFEWASTE
WWW.SAFEWASTE.GLOBAL

At SafeWaste, we are on a mission to stop fly-away trash and recycling from entering the environment through preventable circumstances – namely the loss of materials from curbside collection carts.

Our **auto-release lid latching system** keeps cart lids secure—helping fleets **cut route times**, **prevent carts from tipping in the wind**, and **reduce lid breakage**. The result? Lower operational costs, safer operations, and a cleaner environment.

Let us help put money back in your pocket!

Your Litter Solution

Secure your trash with Safewaste lid latch.

- Automatic Release
- One-piece Design
- Operates in Extreme Temperatures
- 10 YRS Exceptional Durability
- Made of Recyclable TPU

SAFEWASTE
WWW.SAFEWASTE.GLOBAL

The SafeWaste auto-release, wind lid latch helps municipalities, waste collectors, and households keep their waste and recycling where it should be – in the trash can - until it is emptied into the collection truck

Quick and Easy installation

Low cost, Simple, Effective

The Safe Way to Secure Your Waste

Designed to meet the needs of the waste industry.

Reduces fly-away litter

Rodent-Proof

Better waste collection with auto-release system

Cleaner and safer neighborhood

SAFEWASTE
WWW.SAFEWASTE.GLOBAL

The very first auto-release cart lid latch that is easily installed on any 2 wheeled trash, recycling, or organics cart.

Suitable for all manual, semi-automated, and automated waste streams:

GENERAL
RECYCLE
YARD-WASTE
ORGANIC

WIND DEFENSE

Maintains a secure lid, preventing contents from spilling out and lessening environmental impact.

SAFEWASTE
WWW.SAFEWASTE.GLOBAL

Significantly increases wind stability - resulting in fewer carts blowing over and increased collection efficiency.

Safely prevents lid from being blown open – meaning less clean up costs and injury reductions

Reduces landfill costs - SafeWaste latch keeps cart contents dry during inclement weather.

SAFEWASTE

Fits Most Bins

Our lid lock securely fits various-sized curbside bins or carts **with just one strap**, whether they have handles or not, for any waste type.

*Not compatible with Toter EVR1 model 76596 wheeled bins. Check the lid for the model number; for Toter bins, drilling an extra hole is needed for the hook.

SAFEWASTE
WWW.SAFEWASTE.GLOBAL

Meets specified latching requirements from municipalities.

Improved resident waste collection expectations.

Sets a limit on over filling of carts.

Latch eliminates improvised solutions e.g., bungee cords, tape, rocks, bricks, etc.

Improves efficiency and reduces route times by keeping the cart lid closed until emptying, resulting in fewer spillages for the driver to clean up.

Average ROI less than 10 windy days

SAFEWASTE

Cleaner and Safer Community

Safewaste is committed to minimizing litter and improving environmental well-being.

Automatically releases when inverted by waste collection truck

Drivers can unlatch without exiting the truck, minimizing the need for cleaning up spilled contents.

SAFEWASTE
WWW.SAFEWASTE.GLOBAL

Greater job satisfaction equals better driver retention.

Reduction in lost litter clean up.

Drivers exiting vehicles less often means better Health & Safety outcomes.

Lessens the health risks faced by collection workers.

Improved business outcomes – puts money back in your pocket

Why Choose SAFEWASTE

Low cost - high value

Our product is low cost per unit, quick and easy to install and lasts the lifetime of the bin

Target audience

Municipalities, waste collectors and bin manufacturers, as well as suppliers to, and end users / homeowners

Cost savings

Reduce expenses associated with cleaning up spilt curbside bins – especially after wind events

Less injuries from drivers exiting their truck means fewer worker's compensation claims and lower insurance premiums

Easy to use

A simple product that is easy to use and benefits everyone – including the environment
